Fractional Ownership

Citation CJ3

Discover the exclusive opportunity to own a share of a Textron Aviation Cessna CJ3 Private Light Jet through our unique fractional ownership model. This unique investment offers luxury, convenience, and flexibility, enabling you to enjoy the benefits of private jet ownership at a fraction of the cost.

Benefits of this Fractional Ownership Program

- Reduced upfront costs compared to full aircraft ownership.
- Access to a luxury Citation CJ3 private jet for personal or business travel.
- Predictable annual usage with up to 100 occupied hours or more per year.
- Flexibility to use the aircraft across the Continental US, Canada, Mexico, and Caribbean.
- Opportunity to offset costs through charter revenue.
- Zero management fee.

Aircraft Details and Ownership Share

The Citation CJ3 aircraft, renowned for its efficiency and performance, is the subject of our fractional ownership opportunity. Each quarter share grants the owner 100 occupied flight hours annually, providing a seamless and cost-effective solution for frequent flyers.

Financial Considerations and Usage Fees

The cost per quarter share is \$1,575,000 and our two-tiered pricing system is designed to cater to varying flight needs with specific rates for occupied hours:

- \$4,500 per occupied hour for the first 50 hours, (Tier 1) offering value for occasional flyers.
- \$7,500 per occupied hour for over 50 to 100 hours, (Tier 2) for more frequent travelers.
- \$250 per hour revenue share for every charter or Tier 2 owner hours.

Booking and Usage

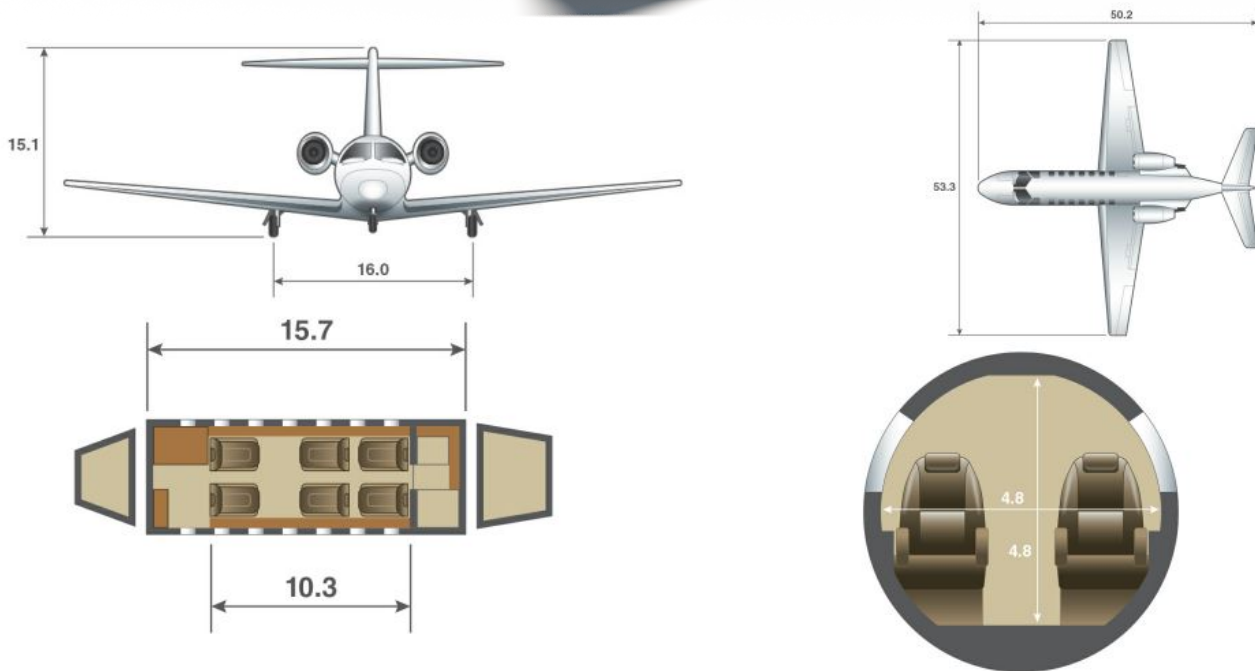

Ownership shares not only grant you access to luxurious and flexible travel options but also come without the burden of monthly management fees. Our flights require ten (10) days advance booking. This allows us to charge the most competitive rates, so the scheduled traveler does not subsidize the last-minute flyers.

Term and Conditions of the Agreement

The Fractional Ownership Agreement is structured with your convenience and security in mind. For flights outside the continental US the owner pays for the time back to the closest point of entry back into the US or the next flight segment, whichever is lower. For a detailed overview of the terms, conditions, and how this opportunity can be tailored to fit your individual needs, please contact us directly.

LEGACY JETS

Personalized Jet Management

About Legacy Jets

Legacy Jets is a certificated Air Carrier with FAA issued Air Operator Certificate (AOC) 54NA5230 based in West Palm Beach, Florida and Scottsdale, Arizona.

We are a full-service charter management company that manages aircraft for independent owners and fractional share owners. Aircraft management requires a great deal of expertise and Legacy Jets has over 125 years of diverse aviation experience in its executive team.

While the management of an Air Carrier is complex due to the highly regulated environment in which it operates, the business premise is that of a service-oriented company. The key objectives are to provide management services to aircraft owners and to offset the cost of ownership through the sale of chartered flights in a safe, efficient, and customer service-oriented environment.

Our goal is to make the aircraft owner's experience convenient and stress free. Legacy Jets' revenue model earns profits almost entirely on the sale of charter and we are one of only a rare handful of air carriers willing to take on the risks of operating select models of aircraft. Particularly Cessna Citation CJ series, Excels, Sovereign, and Citation X.

By allowing Legacy Jets to take on the operating risks, including maintenance and flight crews, aircraft owners enjoy a seamless and hassle-free experience. We offer a transparent net payment system based on hours flown, as well as providing a fixed owner rate, ensuring that owners benefit financially without the burden of operational expense. This innovative model ensures that every flight contributes to the owner's profitability. Partner with us and watch us redefine private jet ownership.
